LOCK

MULTI-POINT LOCK FOR MORE SECURITY

ADVANTAGES

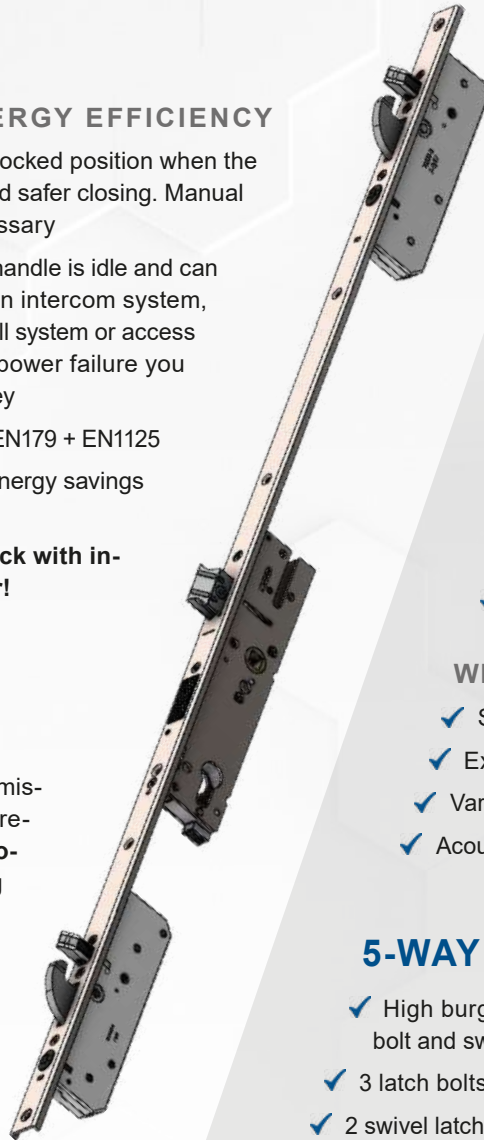

SAFETY, COMFORT & ENERGY EFFICIENCY

- ✓ Self-locking: all bolts move to the locked position when the door is closed. It enables faster and safer closing. Manual locking by hand is no longer necessary
- ✓ Handle on both sides: the outside handle is idle and can be activated electrically, e.g. by an intercom system, smart home system, emergency call system or access control system. In the event of a power failure you can still open manually with the key
- ✓ Panic function tested according to EN179 + EN1125
- ✓ Sustainable tightness for greater energy savings and reduction of external noise
- ✓ **The first and only multipoint lock with induction without wiring the door!**

BENEFITS

ROUND-UP-PACKAGE

- ✓ Due to the inductive energy transmission, no wiring of the door leaf is required. **For the first time, the retrofitting of a multi-point locking system can be realized without any wiring of the door!**
- ✓ Easy integration into Südmetail ÜManagement as well as into external access control systems
- ✓ Standard profile cylinder still usable

VARIANTS

INDUCTIVE

- ✓ **Inductive power transmission**
- ✓ No wiring of the door necessary
- ✓ Acoustic feedback „locked“ and „unlocked“
- ✓ Control via radio (868.3 MHz), compatible with Südmetail control systems, e.g.
 - >> I/O modules
 - >> ÜManagement RFID reader
- ✓ Supplementary OEM variants can be realized

WIRED

- ✓ Stand Alone (multi-core connection cable)
- ✓ External control (bus connection)
- ✓ Various feedback signals
- ✓ Acoustic feedback

5-WAY LOCKING SYSTEM

- ✓ High burglary protection due to the combination of latch bolt and swing bolt!
- ✓ 3 latch bolts, 20 mm
- ✓ 2 swivel latches
