EXXESS EASY 3

PRODUCT OVERVIEW

Südmetall presents the
new door handle series
exxess easy 3

Südmetall®

EXXESS EASY 3

Exxess easy 3 is the latest mounting system from Süd-metall.

The modern door handle revolutionizes the traditional door opening concept with a fully integrated locking mechanism. This ingenious design makes the traditional key rosette superfluous and ensures a clear door aesthetic.

The mechanism inside the handle allows WC doors to be locked effortlessly by simply operating an intuitively placed slider. A discreet emergency release function offers additional security without detracting from the minimalist look or attracting attention.

The unlockable version of the door handle has no locking function. For additional security, there is also a lockable version that can be opened with a key.

Here too, the slider is positioned almost invisibly on the inside, while the door can be opened from the outside with the key.
DESIGN

The door handle is universally designed and compatible with any standard mortise lock, making it an ideal solution. Its minimalist design blends seamlessly into any modern or traditional environment, emphasizing the purity of the lines without compromising functionality.

Südmetall's new exxess easy 3 door handle combines modern design with security. A real eye-catcher that unites style and protection.
PRODUCT ADVANTAGES

The versatile design of the door handle allows it to be used on both DIN right and DIN left doors, and thanks to the lifting spring on both sides, it always works reliably.
UNLOCKABLE

No sliding bolt

LOCKABLE WC

With an „invisible" sliding bolt on the inside and a discreet emergency release on the outside

LOCKABLE WITH KEY

With an „invisible" sliding bolt on the inside and a locking cylinder on the outside (keyed alike)

The sliding bolt is located on the inside of the door handle for the variants „Lockable WC" and „Lockable with key"
